

Lauramide DEA

INCI Name: Lauramide DEA

CAS Numbers: 120-40-1

Description:

Lauramide DEA is a mixture of ethanolamides of lauric acid. Lauramide DEA is a compound made from a saturated fatty acid called lauric acid and diethanolamine or DEA, an ingredient in some cosmetic products that functions as a wetting agent. Combinations of fatty acids and DEA like lauramide DEA are referred to as diethanolamides.

Technical Data:

Specification		Min	Max
Acid Value			1.000
Alkali Value		10.000	25.000
Appearance @ 25dgr	Clear solid		
Color			3
Odor	Characteristic
